

Demand Response Program

How does it work?

You will be paid to help ease the electricity network at times of high electricity prices.

When we identified the specific timing

we will send you a request

What do participants do?

Participants respond with their agreed amount of reduction for the length of time.

500KW

We will run our standby generator and switch off a few of our air-conditioners.

We will stop our production and run it later.

How much do participants get?

After a successful event, payment is made after calculation

2 hours
@ 1,000 KW

\$1,000

2MWh saved
(\$500/MWh)

Who can participate?

There are specific requirements such as minimum load and ability to respond. Please contact us for an evaluation.
